Bring Your Own Device (BYOD) Policy

DOCUMENT ID	IT-001	VERSION	3.0
POLICY OWNER	Information Security	CLASSIFICATION	Internal
EFFECTIVE DATE	2026-04-01	NEXT REVIEW	2027-04-01

> Defines whether and how personal devices, including personal laptops, may access company data.

1. Scope

This policy governs the use of employee-owned (personal) devices — laptops, phones, and tablets — to access TechTrapture systems and data. It works alongside the Data Classification Policy.

TechTrapture-issued managed devices are governed by the Acceptable Use Policy, not this policy.

2. Personal Laptops

Personal laptops may not be used to access, store, or process data classified as Confidential or Restricted under any circumstances. Personal laptops may access only Public and Internal data, and only after enrollment in the TechTrapture MobileGuard MDM profile and connection through the company VPN.

Where an employee's role routinely requires Confidential or Restricted data, TechTrapture issues a managed laptop and personal-laptop access is not permitted for that work. Contact IT to request a managed device.

3. Personal Phones & Tablets

Personal phones and tablets may access company email, calendar, and chat after enrolling in MobileGuard. Enrollment enforces a device passcode, disk encryption, and the ability to remotely wipe TechTrapture data only (selective wipe).

Jailbroken or rooted devices are prohibited from accessing any TechTrapture data.

4. Security Requirements

All BYOD devices must run a supported, patched operating system, have full-disk encryption enabled, and use the company VPN for access to internal systems. MobileGuard continuously verifies these conditions.

A device that falls out of compliance is automatically blocked until remediated.

5. Loss, Theft & Offboarding

Lost or stolen BYOD devices must be reported to security@techtrapture.com within 24 hours so a selective wipe can be issued.

On offboarding, all TechTrapture data and the MobileGuard profile are removed from personal devices; personal data is unaffected.
